Jack,

I am coming to the meeting and I would enjoy having time to continue our discussion on your biofuels research project. I arrive on Saturday night and will stay through Wednesday night, departing on Thursday morning. It will be a busy meeting but I know we will find time to meet. I'll call you on Sunday to check in.

Jeff

Hi Jeff,

Are you coming to the National Tank Conference?  
 I am thinking of finding a time in St. Louis so that we can continue our talk regarding the biofuel research project.  
 My cell phone is [REDACTED]. Jack

Hi Jack,

I'm sorry I missed you - I had another appointment and was unable to get back in time. I've attached the email I sent to Andrea. Please review this and let's discuss it. Can we talk tomorrow from 1:30-2:00 PM (3:30-4:00 EST)? I'll put this on my calendar to preserve the time slot.

Again, my apologies for missing you today.

All the best.

Jeff

Jeff:

You said that you would call me after you finished your morning meeting. I was awaiting for your call.

I'll be in the office for another hour or so today. I am very much open tomorrow.

Can you call me tomorrow? I need your idea for the write-up of project proposal. Thanks. Jack

Andrea,

Please see the attached draft White Paper I developed at your request. This represents my own ideas and observations regarding trends that we may be starting to see in Montana and across the country and does not represent an official position from ASTSWMO. Please feel free to use this to develop a more detailed position paper to support EPA work and funding efforts to address the question of correlation between MIC and ethanol blended fuels.

Note that I only cited a small number of references that I gathered from the internet. This list does not include the excellent fuel compatibility articles published in LUSTline that should also be cited.

Let me know how I can help and if you would like to have a follow-up conference call when Mahesh returns to his office. He may want to support this effort through the ASTSWMO Alternative Fuels Workgroup.

Thanks!

Jeff
